## **Monitoring Your Dialysis Water Treatment System**

Dialysis Water Treatment System Water treatment systems used in dialysis are a critical factor in the overall care received by dialysis patients; they also provide one of the greatest hazards to the patients if they are not functioning properly. Monitoring of water treatment systems has been an identified area of concern, and an

## **Hemodialysis | NIDDK**

Hemodialysis is a treatment to filter wastes and water from your blood, as your kidneys did when they were healthy. Hemodialysis helps control blood pressure and balance important minerals, such as potassium, sodium, and calcium, in your blood. Hemodialysis can help you feel better and live longer, but it's not a cure for kidney failure.
