Sheet Metal Fabrication Process [Step

The very first step in the process of sheet metal fabrication is to create a design of the final product. In case you are manufacturing the product for someone else, the design or a rough design idea will be provided by your client in most cases. This is the case with most of the companies which are manufacturing sheet metal products as an OEM ...

Step

Step-by-Step Guide to Installing Corrugated Metal Roofing. Corrugated metal roofing is either aluminum or galvanized steel. It is used mainly on sheds, barns and similar buildings. It is rarely used on residential roofs, because it is harder to insulate properly. There are many corrugation patterns, with the height and width of the peaks and...
